Lesson 4.3
Final Project Review

DAILY OBJECTIVE

Students will review their project progress, and complete final changes to their projects or their Community Review research.

DEFINITIONS

Here are a few terms that you might find useful today.

1. **Elevator Pitch:** A short, easily repeatable speech that quickly outlines a product, project or service. Elevator pitches tend to be designed to emphasize the most important aspects of a project to the person who is receiving the pitch. (i.e. a product investor may want to hear additional details about the product's profitability, while a user may want to hear more about the product's functionality.)

Section 1: Project Review

1.1 Individual Review

Review the work you've completed so far on your project. Assess whether today's time should be spent further reviewing how potential users may interact with your project, or finalizing the project elements themselves.

Complete the "Individual Review" Activity Worksheet.

A	5-10 Minutes	**Individual Review** While completing the "Individual Review" Activity Worksheet, consider the work you've completed so far, your interview progress, research progress, and project progress. What is the most important thing to having a successful show and tell session in the next lesson? Students should then determine their best next steps!

1.2 Project Wrap Up

Based on your individual review, complete the most important elements for your project overall such as:

1. Fixing last minute, project-breaking bugs.
2. Finishing a final project feature.
3. Conducting additional community research or interview preparation.
4. Developing a short elevator pitch to describe their project to users during the Show and Tell.

Record your next steps in the "Individual Review" Activity Worksheet prior to starting your work!

Individual Review

Complete a short, individual review of your project progress. Determine what your best next steps are during this final session before your interactive show and tell!

Overall Review

Project Review

Are there any pressing issues, bugs, or features that need to be completed for your project to function? If so, note them here.

Community Review

Have you conducted your community interview? If not, will you be able to conduct a community interview before the interactive show and tell session?

Elevator Pitch

Are you able to describe your project in a short, memorable way to potential users? If not, can you use your community research and knowledge of your project to develop an elevator pitch?

Next Steps

After reviewing your progress, what are the most important things you should complete, before your show and tell?

Note what you'll complete today!
